

STEP 1 Before beginning, make sure your printer is not scaling this page. Ensure that page scaling is set to “none” in your print dialog box and print this page.

STEP 2 After printing, measure the bar below to ensure it’s exactly 2 inches long.

If it’s not 2 inches long, check that you are printing the page at full size and reprint before continuing.

STEP 3 Use one of the following methods to measure your ring size:

Method 1: Measure finger with paper sizer

1. Cut out the below outline of the sizer as well as the small slit at the left end of the sizer.
2. Wrap the sizer around the finger the ring is for with the numbers facing out.
3. Slide the pointed end of the sizer through the slit.
4. Move the sizer to the largest part of the finger (this may be the knuckle).
5. Pull tightly. The sizer must fit snugly to produce an accurate size.
6. The number that lines up at the slit represents the ring size for that finger. You’re done!

TIP

Avoid measuring cold fingers as this is when fingers are at their smallest. Instead, measure your finger at the end of the day. This is when it is largest.

Method 2: Measure current ring

1. Select a ring that properly fits the finger the ring is for.
2. Place the ring over the circles below, matching the inside side of the ring to the circle nearest in size.
3. If the ring falls between two sizes, order the larger size. You’re done!
